Plastics and recyclables

Collected once a week on ☐ day

Please make use of alternative collection points, such as local group collections, supermarkets, or convenience stores whenever possible.
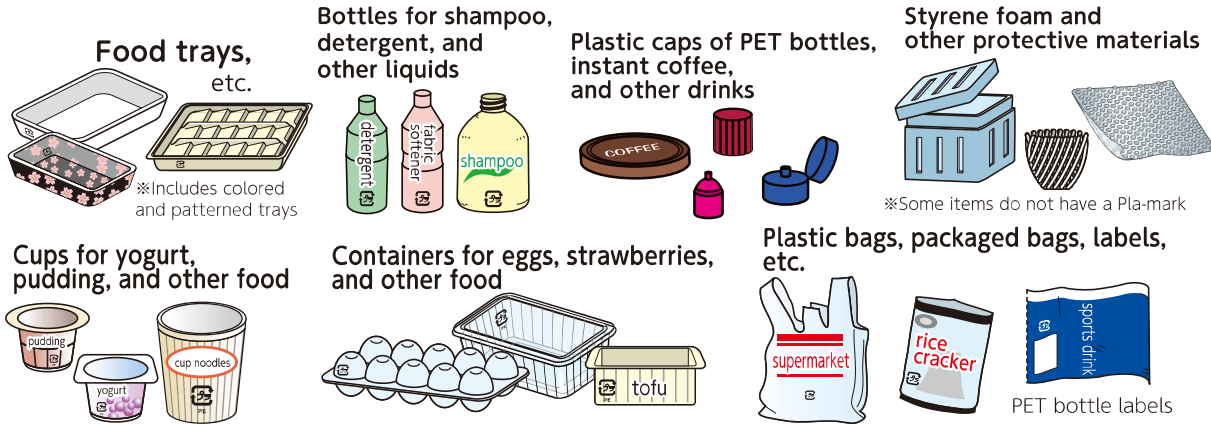

How to separate plastic containers and packaging for recyclables

The Pla-mark is printed on containers and bags that contain goods such as food and clothing.

Garbage with a Pla-mark that are not dirty and don't have silver parts is recyclable.

Food trays, etc.
※Includes colored and patterned trays

Bottles for shampoo, detergent, and other liquids

Plastic caps of PET bottles, instant coffee, and other drinks

Styrene foam and other protective materials
※Some items do not have a Pla-mark

Cups for yogurt, pudding, and other food

Containers for eggs, strawberries, and other food

Plastic bags, packaged bags, labels, etc.

PET bottle labels

How to dispose

◆Wash to remove dirt and drain.
◆Items with stains that cannot be removed or silver/aluminum parts go in burnable garbage.
◆Remove as many trademark labels and price tags as possible.
◆Put them together in a transparent or translucent bag that you can see the inside of.
◆Do not put glass bottles, cans, and PET bottles together.

How to separate
	How to separate	How to dispose
PET bottles	♳ PET **PET bottles with a PET mark** Juice, green tea, sports drink, alcohol, soy sauce, soup, mirin, etc.	●Place in the green collection net after removing the cap and label and rinsing the inside lightly. ●Put out caps and labels as plastic containers and packaging.
Glass bottles	**Glass bottles for beverages and food such as juice, alcohol, and wine** Food bottles for jams and seasonings	●Place in the yellow container after removing the cap, rinsing lightly, and draining. ●Place other glass such as oil and cosmetic bottles, cracked bottles, heat-resistant glass, bulbs, fluorescent lamps, flat glass, and cups in non-burnable garbage.
Cans	**Aluminum and steel cans for beverages and food, beverage cans such as juice and beer cans, and food cans for tea, seaweed, cookies, etc.**	●Place in the blue container after rinsing lightly and draining. ●Place other cans such as oil cans, paint cans, 18-liter square cans, spray cans, cassette gas cylinders, etc. in the non-burnable garbage.
Used paper	**Newspapers (including fliers), magazines, and paper waste, cardboards and paper cartons (white inside).** * Paper such as photographs, thermal paper, paper with oil and medicine, shredded paper, paper with plastic stuck should be placed in the burnable garbage. * As for the kind of paper waste, please see Page 3.	●Tie up garbage of the same type with string before putting it out. ●Paper cartons (e.g., milk) must be 500 ml or larger and white inside. Rinse with water, cut open, and dry before disposing. ●Tie paper waste such as snack and tissue boxes together with magazines, or tie them with only paper waste.
